NightBuild:

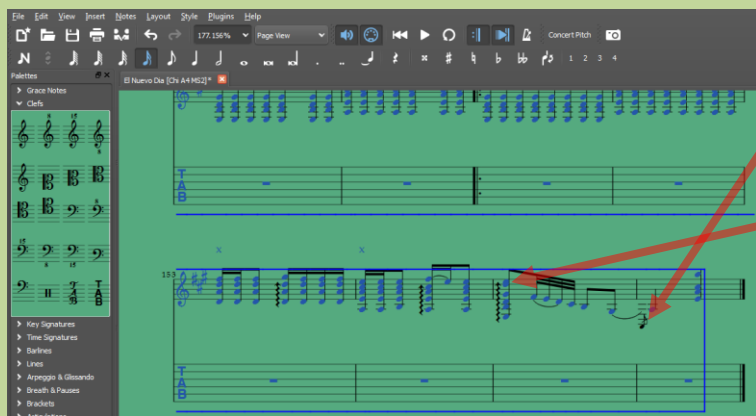

github-musescore-musescore-c6cba47 (on Windows 7 Home Premium 64bit)

I open the score. There is octave clef, but score is for guitar, so I want to change that to no-octave, ordinary plain clef.

BTW, some hover-'buttons'-pop-up dialogs are in Slovenian (local – system) language, though I have changed language to English immediately after 'installation'. Yes, I have restarted MScore, many times since then.

Back to topic. I d'n'd ordinary violin clef onto staff and all system gets changed to violin clef. Me good. MScore better. LOL!

This little fellow did NOT received re-transportation ticket. I pretend I did NOT notice, so CTRL-⇧, since I want all notes back in black, sorry, back in place.

Well, well, now he did received re-transportation ticket. Bit too late, since all others went back in place. Weird Al Jankovich... and his brother – those two notes were before and should be now facing opposite directions. Closing the MScore and opening it again does solve this problem. Little fellow was moved by my intervention.
