

Vertical positioning of multiple slurs

Example 1: Slurs above the notes

Two scores: The first with automatic positioning (yellow marker), the second what I want (green marker)

Example 2: Slurs below the notes

Two scores: The first with automatic positioning (yellow marker), the second what I want (green marker)

Problem: The outer slur doesn't seem to recognize the inner slurs thus forcing individual positioning of each slur.

Suggestion: Adjust the positioning and form of the slurs to allow whitespace between them when there are multiple slurs.
