The Spiders From Our Car

In June of 2018, we were packing up to go to a campground. My dad rented a cabin in Cottonwood for a couple nights. I was really excited packing everything up and getting ready for a 3 hour drive. We left early in the morning with our dog and 4 of my family members, which is all of my family, not including me. Getting out of the car, I started to look around at all the nature around me. Beautiful trees and it's nice outside at around 70 degrees. When we went on a walk, I saw lizards and squirrels and some cool caterpillars with a yellow back and horns. The next day we woke up with a house spider in our cabin that was next to my mom. She yelled and killed it but it was still terrifying. That same day, I saw a spider with babies walking on a trail to a lake to fish. I'm not afraid of spiders but when they frantically go onto me, I hate it so much. I even scream like a little girl.

Last day there, we went to a lake before leaving. When we packed up, something was in my sister's bag. I opened it and 3 big spiders came out, straight onto me. It was horrifying, they were huge spiders. I screamed and ran inside and took off my shirt and stomped on my shirt to try to kill them. It was a scary but funny experience but just remember to always check your bags when on vacation.
