WIRELESS DEVICES, MUSICALIS, ETC.**

**CAN ALSO BE
ACCOMPANIED WITH
KARAOKE**

**EXCELLENT FOR
EDUCATION AND
CHILDREN ORCHESTRAS**

FOR DISABLED

DESCRIPTION

*ONE-KEY-PLAY via a smart notation software may be described as a simple, fast, amusing, effective, straightforward, intuitive, practical and logical approach to music learning and playing from day one. By playing at performer's pace and rhythm, it frees him/her from timing's tyranny. It is like humming a song with two fingers.

*It works simply by playing sequentially one note (or set of notes) after the other at player's rhythm, one key (duplicated) at a time.

*Can play all instruments, including percussion.

*Disabilities and age are no obstacles at all.

*This idea is supported by the importance and need of music to humankind, from recreation to medicine.
