

nous adopterons une écriture simplifiée. Sauf dans les cas prêtant à confusion, nous n'écrirons les notes de l'accord utilisé que sur la première percussion de chaque rasgueado.

Après avoir "déchiffré" la technique d'un rasgueado, il sera nécessaire de le "mettre en place" progressivement à l'aide du métronome en comptant rigoureusement les temps.

On commencera à la vitesse de 80 à la noire pour atteindre la vitesse de 140 minimum à la noire.
