

Yup. Very slick. The phrase to look for seems to be `<no>1</no>`

Except that... when I did Find `<no>5</no>` Replace with `<no>1</no>` it moved Verse 6 to the Verse 2 line, etc.

The first verse doesn't seem to have a `<no>1</no>`. That tag is on verse 2, and rest of the verse numbers are all one number off.

```
<Chord>
  <durationType>eighth</durationType>
  <Lyrics>
    <text>1. I</text>
  </Lyrics>
  <Lyrics>
    <no>1</no>
    <style>Lyrics Even Lines</style>
    <text>2. I'm</text>
  </Lyrics>
  <Lyrics>
    <no>2</no>
    <text>3. The</text>
  </Lyrics>
  <Lyrics>
    <no>3</no>
    <style>Lyrics Even Lines</style>
    <text>4. No,</text>
```

Yet, the Select by subtype box shows the correct verse numbers in MuseScore. Go figure.
